CAREER OBJECTIVE

Second-year B.Tech student (CSE & Data Science) with hands-on Excel skills built through self-driven, verifiable projects — interactive dashboards, data cleaning and business-insight reporting. Seeking a Data Analyst internship to apply Excel, SQL and Python on real-world problems, while continuing to build a public, proof-backed analytics portfolio.

EDUCATION

B.Tech — Computer Science & Data Science (CSE & DS)

2025 – 2029 (Expected)

Bhubaneswar Engineering College (BEC), Khordha, Odisha

Current CGPA: 8.14 | 1st Year CGPA: 8.10

Class XII — Odisha Board

Percentage: 82%

TECHNICAL SKILLS

Data Analytics: Advanced Excel · Data Cleaning · Dashboard Design · Data Visualization · Pivot Tables & Charts · Slicers · Conditional Formatting · Data Validation · VLOOKUP · XLOOKUP · INDEX-MATCH · SUMIF/SUMIFS · COUNTIF/COUNTIFS · TEXTJOIN

Programming: Python (Intermediate) · NumPy (Intermediate) · SQL (Intermediate) · Pandas (Learning)

BI Tools: Power BI (Learning) · Tableau (Learning)

Web / Other: HTML · CSS · MS PowerPoint · MS Word · Google Sheets

DATA ANALYTICS PROJECTS

Vrinda Store Annual Sales Dashboard

Tool: Microsoft Excel

- ▶ Built a fully interactive KPI dashboard with dynamic slicers (Month, Channel, Category), enabling one-click filtering across the entire dataset
- ▶ Visualized monthly Sales vs Order Count via combo chart; added pie/bar charts for gender split, order status, top-5 states and channel distribution
- ▶ Surfaced key insights: 92% delivery success rate; Maharashtra led state-wise revenue at ₹2.99M; Women drove 64% of orders

🔗 [Vrinda Store Dashboard.xlsx](#)

Swiggy Orders — Data Cleaning & Standardization

Tool: Microsoft Excel

- ▶ Cleaned 130+ raw order records with inconsistent field merging, missing delimiters and case mismatches
- ▶ Applied TEXTJOIN formula to consolidate multi-column order data into a structured, analysis-ready format

🔗 [Swiggy Orders DataCleaning.xlsx](#)

Product Sales & Revenue Analysis

Tool: Microsoft Excel

- ▶ Used XLOOKUP (with MAX/MIN) to auto-identify best and worst selling products from a 10-product catalogue
- ▶ Computed category revenue via SUMIF — Electronics ₹4.39L · Clothing ₹72.5K · Accessories ₹86.4K
- ▶ Wrote business insight report with data-backed recommendations (e.g. focused promotions for high-ticket items in Tier-3 markets)

Full Excel portfolio: [Google Drive Folder →](#)

OTHER TECHNICAL PROJECTS

Also develops full-stack and Python projects — AgroVision AI (Flask, AI crop-disease detection, weather/soil dashboards), BharatYatra tourism website (Hackathon winner) and a Netflix-clone UI. Full code on [GitHub →](#)

CERTIFICATIONS

- ▶ Basic Computer Certification
- ▶ HTML & CSS Certification
- ▶ AI Tools Workshop Certification — B10X

ACHIEVEMENTS & ACTIVITIES

- ▶ Participated in 2 Hackathons (College-Level & Inter-College) — BharatYatra tourism site presented as hackathon project
- ▶ Maintaining 8.14 CGPA in B.Tech (CSE & Data Science)
- ▶ Running [@suraj.analytics](#) on Instagram & Youtube — sharing daily Excel learning, projects and analytics insights publicly
